Introduction

Farrow and Ball Ltd are manufacturers of high end paint and wallpaper products that transform rooms around the world.

Project Description

As part of Farrow & Ball's extensive UK store refresh programme, FLR have become an integral part of the 'team'. Installing Amtico's Worn Oak wood in the corporate Farrow and Ball 'herringbone' pattern has become one of our classic installations. From the initial surveying of each individual store, through to the final placing of the

signature 'F&B' entrance mat. We have a dedicated team that specifically carry out Farrow and Ball work therefore achieving the quality and consistency the Client requires.

Products

- Amtico Signature range (Worn Oak) bespoke 'Farrow & Ball' herringbone size pattern.

Each store presents its own unique problems; from existing historic buildings through to modern retail units we approach every store as a one off project. The final result is a fantastic looking corporate installation that we feel proud to be associated with.

Gary Lloyd

Technical Director FLR Group
